- Seasoned hands-on technology leader with 23 years driving end-to-end software teams in web, data and applied AI solutions for Fortune 500 enterprises. Deep expertise in GenAI-powered applications (RAG, agentic frameworks & workflows), designing scalable and distributed systems.
- Seeking senior tech-leadership opportunities in Software Engineering, Architecture and Solution Engineering.
- Open to domestic and international travel as per business need. Authorized to work in US.

Core Competencies

- **Solution Architecture & Design** : Event-Driven Microservices Architecture • Cloud Native Architecture
- **GenAI & Applied AI**: Opensource AI Agentic Frameworks (LangChain, LangGraph, Agno, AutoGen, CrewAI, Google ADK) • RAG • LiveKit • Prompt Engineering • Vector DBs (Qdrant, Pinecone, Weaviate, Chroma, Faiss) • Worked with both closed (OpenAI, Anthropic, Google Gemini) and opensource LLMs
- **Data Engineering**: ETL Pipelines • PySpark • Kafka • HIVE • Pandas • Real-time Streaming • Batch Processing
- **Web Engineering**: Python • FastAPI • ReactJS • NextJS • NodeJS • PHP (Hack) • GraphQL • RESTful APIs • SQL • RDBMS (Postgres, MySQL) • NoSQL (MongoDB, DynamoDB) • Docker • Microservices Architecture
- **Other Technologies**: C/C++ • Linux CLI • AWS (EC2, S3, Lambda, SQS, Glue etc) • Jupyter Notebook
- **Client Engagement**: Technical Presales • POCs & Demos • Executive Presentations • Training • Public Speaking
- **Leadership & Delivery**: Cross-Functional Teams • Agile/Scrum • Mentoring & Hiring • Team Building

Professional Experience

- | | | |
|---|---|-----------------------|
| Software Engineering Lead | Meta (Facebook) | Aug 2022 - April 2025 |
| <ul style="list-style-type: none">◦ Led development of GenAI based agentic solution using Llama LLM for sales-call analytics that summarizes call transcripts, extracts action items (with owners and due dates), and auto-schedules reminders—improving follow-up task completion by 30% and reducing missed opportunities by 25%.◦ Architected core Meta CRM modules for pipeline management and account planning — enabling sales leaders to visualize deal stages, track health scores, and forecast revenue with real-time insights.◦ Collaborated with cross-functional team (Sales, Operations, Design, Data Science and Analytics) to gather requirements, ran 15+ discovery workshops and demo sessions — accelerating feature sign-off by 20%.◦ Designed and delivered a scalable microservice leveraging Meta's internal event-driven pipelines to power interactive performance dashboards — cutting report generation time by 80%.◦ Recruited, mentored and grew a team of 12 engineers; encouraged culture of automated testing and improved peer-review standards — boosting deployment frequency by 40% and reducing post-release defects by 35%. | | |
| Senior Technology Architect | PennyMac Loan Services LLC | Jan 2021 - July 2022 |
| <ul style="list-style-type: none">◦ Led a team of 10 data engineers and data analysts to migrate traditional data pipeline into distributed PySpark jobs on AWS EMR, achieving 3× faster weekly reporting.◦ Hiring, mentoring and building teams of software engineers, software architects & managers to fulfill the resource needs. | | |
| Senior Technology Architect | Cognizant (Client: American Express) | July 2014 - Jan 2021 |
| <ul style="list-style-type: none">◦ Co-created "Jumpstart," a Node.js application framework that cut new service spin-up time by 60%, accelerating enterprise application development and deployments across 50+ teams.◦ Technically led a 9 member data & software engineering team to develop email marketing campaign system, 1-click offer enrollment system — boosting open rates by 18% and incremental spend by \$8 M+ annually.◦ Migrated legacy Talend ETL jobs to a PySpark cluster, slashing compute costs by 45% and improving data freshness from daily to hourly.◦ Engaged business stakeholders in bi-monthly strategy sessions; defined architectural roadmap and oversaw delivery of three enterprise-grade solutions in MarketingTech.◦ Hiring and mentoring team of engineers and senior engineers | | |

Cofounder & CTO

S3 TechZulla Pvt. Ltd

Oct 2012 - July 2014

- Founded a [SaaS company](#) that launched three SMB-focused products ([RetailEMall](#), [DesignStudio](#), [TravelCRM](#)), acquiring 150+ paying customers within two years and generating \$200 K ARR.
- Architected multi-tenant SaaS e-commerce platform for SMB. Developed using React/Node.js, MySQL; integrated multiple payment gateways and autoscaling to support peak loads of 100 K concurrent users.
- Led all client presales and technical demos, achieving a 75% conversion rate on inbound leads through customized POCs and ROI analyses.

Earlier Roles

- **Technology Architect** at [Infosys Ltd](#), (2011–2012) – Grew team from 2 to 8 to perform Cloud migration for Capital Group; improving uptime to 99.9%.
- **Manager, Technical Presales** at [NEC India Ltd](#), (2008–2011) – Built a 24-member solutions-engineering unit; delivered 50+ POCs and supported sales of \$10 M in B2B deals annually through software sales groups in NEC subsidiaries globally. Developed solutions with [NEC' ExpressCluster](#), [Virtual PC Center \(VPCC\)](#) and [NEC SpheriCall](#) along with virtualization software like VMware, Hyper-V, KVM etc.
- **Technology Lead**, [NEC India Ltd](#), (2006–2008) – Ported OpenSolaris to ARM for Toyota, leading a multilingual team of engineers onsite in Japan.
- **Member Technical Staff** at [Cadence Design Systems](#), (2004–2006) – Enhanced RTL compiler performance by 20% through algorithmic optimizations in C/C++.
- **Software Engineer** at [Computer Associates](#) & [HCL Technologies Ltd](#), (2002–2004) – Developed IAM (Identity Access Management) modules and ATM management modules, supporting 5-bank deployments across Asia.

GenAI Certifications

Fundamentals of AI Agents , by HuggingFace	2025
MCP Course Certification , by HuggingFace	2025
GenAI Fundamentals , by Databricks	2025
5 Day GenAI Intensive Program , by Google and Kaggle	2025

GenAI Personal Projects

- 1 **Mini-ManusAI - Fullstack AI Agentic App (Docker, Playwright)** - [Demo Link](#), [Github Link](#)
Fullstack AI agentic app that can surf the internet using a full browser running in a Docker container.
- 2 **Fullstack AI Agentic App (Python, Agno, Gemini, NextJS, ReactJS)** - [Demo Link](#), [Github Link](#)
This is fullstack AI agentic app showcasing capabilities of frontend tools (Genrative UI, HITL, Background color change) and backend tool (Web search, Web crawling.)
- 3 **AI Agent to Automate Web Browsing (Python)** - [Demo Link](#), [Github Link](#)
This is a python AI agentic project to automate the web browsing and actions without any human intervention.
- 4 **Voice AI Agent (Python, NextJS, ReactJS)** - [Demo Link](#)
This project uses the open-source speech to speech model for conversational AI voice bot. It can be used for automating customer service, sales calls etc.
- 5 **Local Podcast Generator (Python)** - [Demo Link](#)
This project uses the LLM to first generate the podcast script on given topic and then uses open-source text to speech (TTS) model (Kokoru) to generate audio for each speaker and stitches the whole audio to convert it into podcast. Here is the [generated podcast](#)
- 6 **Chat with Any Database (Python, Agno, NextJS)** - [Demo Link](#), [Github Link](#)
This project shows the capabilities of AI agents to query any database and visualize the data as different graphs, but in natural language. To build this, Used an open-source AI agentic framework named Agno.
- 7 **Integration of Copilotkit and Agno Frameworks** - [Github Link](#)
This project is my opensource contribution to integrate [Copilotkit](#) (React based framework for AI Agentics streaming) and [Agno](#) (python based framework for building AI Agents and AI Workflows).

Education

Panjab University	Chandigarh, India
Masters in Computer Applications (MCA)	1999 - 2002
